PARTNER

WHO WE ARE

ENGINEERING AND INDUSTRIAL SERVICES

**OUR GOAL IS
TO PROVIDE
EXCEPTIONAL
QUALITY, TAILORED
SERVICES, AND
CONTINUAL
SUPPORT.**

REDA Hazard Control is a part of the REDA Group, an international engineering and industrial services company.

REDA Hazard Control offers a full spectrum of end-to-end solutions for hazard control. Our areas of expertise include fire protection, safety, and security. We are a leading provider of fire protection services and safety systems & equipment. We also offer solutions that will improve and enhance your site security.

Our goal is to provide exceptional quality, tailored services, and continual support. We exist to protect the lives of people and the community in which we live and work. This is why we always strive for excellence in all that we do.

Our services are innovative, comprehensive and represent excellent value with professional, world-class local content.

We consider our customers as our partners and we believe in working with you on a personal basis to ensure precision until you are completely satisfied. So when it comes to safety, rest assured that we have all the bases covered.

REDA Hazard Control believes in a team approach for creating a safer facility. We work closely with our clients to formulate and implement high-quality, comprehensive programs that exceed their expectations.

SECURITY EQUIPMENT

THE BEST FOR WHAT MATTERS THE MOST

REDA Hazard Control offers a variety of security equipment used by security guards and personnel which includes tactical accessories, speed detection devices, prohibited item detection and detection equipment, law enforcement equipment in addition to the other equipment listed below:

Security Equipment

- Tactical holsters
- Pouches
- Security car dashboard screens
- Weapon cabinets
- Binoculars
- Hand-held metal detector
- Walk-through metal detector
- Body worn cameras
- Tactical accessories
- Flashlights

Speed Detection Equipment

- Mobile Speed detection
- Vehicle-mounted speed detection
- Fixed speed detection system
- Portable Speed detector
- Traffic sensing and analyzing system
- Road signals and messaging Equipment

Detection & Screening

- Baggage and Parcel Inspection Equipment
- Explosives Trace Detection Equipment
- Vehicle Inspection Systems

PHYSICAL SECURITY EQUIPMENT

AT A COST-EFFECTIVE PRICE

Road blocker, Bollards, Parking arm barrier, Sliding entering gates, Speed bumps are designed especially for entrance points which have a threat of vehicle attack or for the ones that have high security requirements.

Bollards create clear visual barriers for drivers, helping to direct traffic and prevent access to restricted areas. If there is a threat of vehicle attack in addition to the control of vehicle access in high security applications, hydraulic road blockers are the unique solution and the most secure system. If an attempt to pass through the opposite side is made, using tire killers, the tires of the unauthorized vehicle will be destroyed immediately...etc.

**ENGINEERING
AND SERVICES**

ENGINEERED, INTEGRATED SECURITY SYSTEMS

AT A COST-EFFECTIVE PRICE

REDA Hazard Control offers a wide range of physical security systems from leading manufacturers around the world.

Our team has its roots in today's dynamic world of safety and security, and we strive with passion to provide answers to security-sensitive necessities while respecting high quality standards.

Today a wide range of our products are used to control risk by high-end clients.

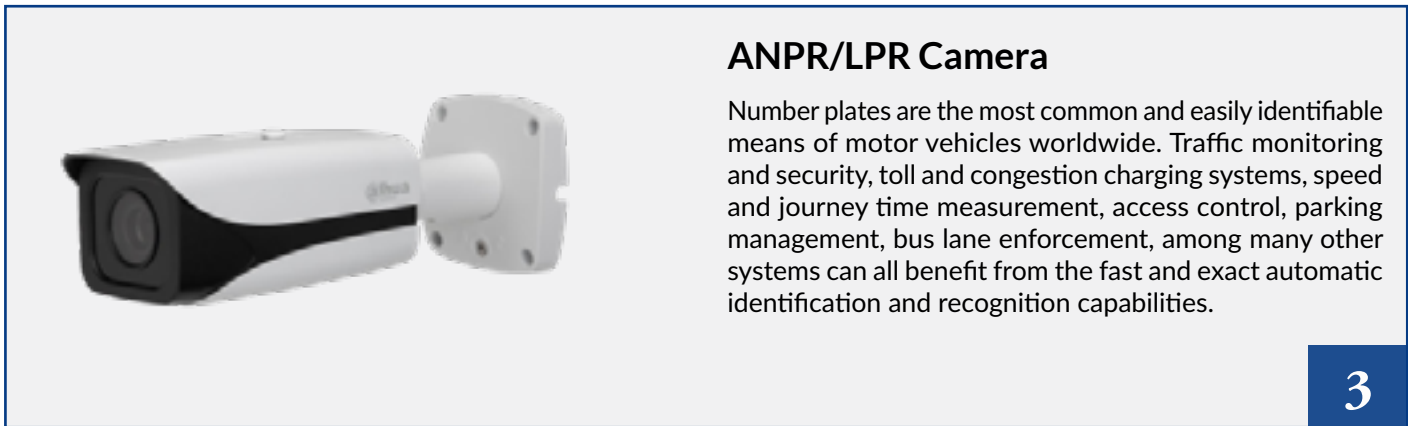

CCTV Surveillance System

Health and Safety - CCTV aids the process of monitoring and maintaining the high level of safety required in factory environments, by identifying possible hazards from unsafe working conditions or practices, as well as ensuring that the existing systems are being properly followed and enforced.

Access Control System

We offer Access control like Finger Print Readers, Palm scanners, 3D Finger Print Analyzers, Long range readers, through proximity cards and key fobs. Our access control solutions also include Iris Recognition System & Vehicle Access Control Systems.

ANPR/LPR Camera

Number plates are the most common and easily identifiable means of motor vehicles worldwide. Traffic monitoring and security, toll and congestion charging systems, speed and journey time measurement, access control, parking management, bus lane enforcement, among many other systems can all benefit from the fast and exact automatic identification and recognition capabilities.

Metal Detectors

Walk-through, and hand-held metal detectors are used to safeguard your premises, events, airports etc against weapons and sharp metals that can cause threat to others.

X-Ray Baggage Scanning System

Abandoned packages in public areas are one of the most serious but often over-looked security threats worldwide. With X-Ray systems, security forces do not have to guess what the package might contain nor attempt to touch the package before knowing exactly what is inside it.

Under Vehicle Scanning System

A solution for fully automatic identification of threats or modifications to a vehicle's undercarriage. Vehicles move over dual vision, sealed scanners, while the displayed system can scan and combine two virtual high-resolution images of the vehicle undercarriage to create the vehicle's footprint.

Guard Tour System

Recently security becomes more and more important since the number of crimes all over the world jumps every year! In such fields where security patrols are the most important part of the operations for industrial and commercial properties. So we offer guard tour system to monitor security guard / patrol personnel's performance, making sure that they finish their job perfectly according to standards requirement.

ENGINEERED, INTEGRATED SECURITY SYSTEMS

OF HIGHEST QUALITY

8

Marine Floating Barrier

For the effective deterrence of intruders and detection of breach of security, put in place the world's most advanced maritime security barrier, the Maritime floating barrier.

9

Fence Protection

We offer perimeter security products which are protecting hundreds of sites worldwide.

We offer microwave protection, buried cable and through fiber optic cable.

10

Time Attendance System

Time and Attendance software can change your organization by providing the following benefits; Reduce errors, Increase security and productivity, Cut costs. Reduce absenteeism, Increase employee attendance.

11

ID Management System

Identity Management (IAM) automates the entry of new personnel and facilitates access to all components of the system with which the company operates. This allows reducing times in the delivery of access so that they begin to produce immediately.

12

Public Address System

Public Address System is the life of addressing a group or a crowd of people. Widely used in almost all small and big premises, whether it is promotional announcement in super markets, flight announcement at Airports or call for prayer.

13

Audio-Video Intercom System

Since the invention of the door intercom systems, we have focused on achieving continuous improvement for our clients and offer the best products for Audio-Video Intercom System.

14

Turnstiles

We offer all types of turnstiles and even provide multiple options to integrate them with access control systems.

15

Long Range and Thermal Cameras

Thermal image cameras designed for long range if needed and surveillance needs. We provide a range of IP67 cameras and have been designed for harsh and challenging environments. For various applications, Public, Open Spaces, Border Security, Aviation, Homeland Security, and Transport

ENGINEERING, CONTRACTING AND CONSULTATIONS

DESIGN, SUPPLY, INSTALL, TEST AND COMMISSION

**YOUR FIRST
CALL FOR
SECURITY
ENGINEERED
SYSTEMS**

We have the capacity to design, supply, install, test and commission of all known physical security systems. Our professional team is well qualified and industry certified to design, engineer and implement systems across the spectrum we serve.

REDA Hazard Control offers:

1. In-house engineering services to carry out detail design in accordance to the project specification as well as HCIS and other regulating standards having relevance.
2. Field engineering services to our prestigious project to determine on site solution to minimize the time required for any installation.
3. Quality control during the project execution.

REDA Hazard Control has collaborated with internationally renowned consultants to provide our customers with a range of specialist consulting services.

- Security Risk Assessment.
- Front End Engineering Design.
- Conceptual Design.
- Facility Security Plan.
- Security Compliance Certification.
- Mass Notification Systems (MNS).

INSPECTION AND PREVENTIVE MAINTENANCE SERVICES

PROVIDING
THE HIGHEST
LEVEL OF
INSPECTION
AND
PREVENTIVE
MAINTENANCE

REDA Hazard Control is committed to provide the highest level of inspection and preventive maintenance for security, equipment and systems.

Our factory trained and certified technicians take pride in ensuring your products and systems are maintained according to manufacturers' standards and guidelines as well as the international codes having reference.

Our services comprise of:

- On-site inspections.
- Preventive maintenance on all types of Physical Security Systems.
- Corrective maintenance & Emergency call-outs.
- Maintain Software with Updates and Security Patches.
- Inspect Security System Health and provide detailed report.
- Upgrade existing or legacy systems.
- Develop Maintenance Plan for Security Infrastructure and Equipment.
- Specialized service for equipment like X-Ray Scanners, UVIS, Explosives Trace Detectors etc.
- Spare parts sourcing and replacement

TURNKEY PROJECTS

EPC SOLUTION & SERVICES

We have the capacity to manage and perform turnkey projects across the sectors we serve working with International Consulting Houses and EPC Contractors. In addition to the technical support provided by our world reputed partners, we have at our disposal the advanced planning, design and modelling technology. We have the right people, products, financial resources and expertise to manage and serve your complete turnkey projects, be it fire protection, security, life safety or emergency response related.

REDA Hazard Control is also HCIS (Higher Commission for Industrial Security) approved Security Systems Contracting Company capable of undertaking large turnkey projects.

- Conduct site survey and perform security gap analysis and evaluation.
- Conceptualization, detailed design and the production of drawings.
- Supply and installation of a wide range security systems.
- Testing & commissioning of systems.
- Provision of As-Built documentation.

We have executed many prestigious projects in the Maritime, Petrochemical, Oil & Gas, Mining and Power Generation Industries since our birth.

1 Vehicles, Trailers & Containers

FHC facility is licensed to design and fabricate trailers and specialized vehicles applying the latest transport industry regulations and standards. We are also a member of National Truck & Equipment Agency (NTEA) of the USA.

2 Pipes & Skid

FHC provides the market with a wide range of Foam & Deluge Skids customized to need using state of the art modelling and engineering solutions.

3 Cabinets & Hose Reels

FHC has the capabilities to design and produce various sizes and shapes of standard and custom-built cabinets by using computerized numerical control machines for high precision, accuracy and ultimate finish.

4 Fire Suppression Systems

FHC Novec 1230™ and FM-200® filling facility is the first of its kind in the region to supply fire suppression systems from TYCO Fire Protection Products.
