EMERGENCY AND FIRST AID EQUIPMENT

AT A COST-EFFECTIVE PRICE

ZOLL Medical Corporation, an Asahi Kasei company, develops and markets medical devices and software solutions that help advance emergency care and save lives, while increasing clinical and operational efficiencies. With products for defibrillation and cardiac monitoring, circulation enhancement and CPR feedback, supersaturated oxygen therapy, data management, ventilation, and therapeutic temperature management, ZOLL provides a comprehensive set of technologies that help clinicians, EMS and fire professionals, as well as lay rescuers, improve patient outcomes in critical cardiopulmonary condition.

01 Comprehensive Rescue System

Our most extensive set of medical supplies help to manage lifethreatening issues such as severe bleeding, seizures, choking, hypothermia, broken bones, allergic reactions, and more.

02 Defibrillator for Integrated Pediatric Rescue

The innovative, intuitive design and enhanced features of this technology gives unexpected heroes both the confidence and the knowledge needed to treat (SCA).

03 AutoPulse for EMS

AutoPulse allows EMS professionals to continue providing high-quality chest compressions down steep stairwells, around sharp corners, or even in a cramped elevator.

04 Transport Ventilator for EMS

Like everything else medics carry, ventilators must stand up to the tough physical demands of the EMS environment.

It is easy to use, portable, durable, and rugged. Designed to be lightweight and energy-efficient.

05 Monitor Defibrillator

Easy-to-use technologies help you consistently deliver highquality CPR and provide optimal defibrillation and pacing treatments for all patients.

06 Monitor/Defibrillator for EMS

It is compact and lightweight and delivers the capabilities you expect from a full-featured monitor. When it comes to durability, its durability is measured against the most current military-specified standards.

07 Targeted Temperature Management Systems

Because patients, clinical scenarios, and protocols differ, the choice of target temperature is based on achieving the best outcome for each patient. Reduce the risk of missing your target. A change in temperature as small as 0.1°C triggers an immediate adjustment in the saline temperature.

08 Portable Ventilator for Hospitals

Transporting respiratory distress patients can be demanding. Switching from ICU devices to bag valve masks or other devices to maintain a patient's appropriate oxygen level is complicated. Supporting the needs of infants through adults, it features a full range of ventilation options, making this portable ventilator not only easy to use but also MRI-conditional, providing patients with high-quality ventilation all the way to the MRI suite.

BURNSHIELD EMERGENCY BURNCARE

AT A COST-EFFECTIVE PRICE

Burnshield is for use when there is direct serious accidental burns and Fire Hazards that could result in trauma. It is considered as a revolution in the area of first aid and burn protection.

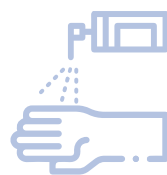

Burnshield is used as a first aid on 1st, 2nd, and 3rd degree burns including facial burns and scalds. Regardless of the cause of the burn (whether fire, chemical, electrical, heat, radiation, sunburn

Burnshield is an ISO 9001 & CE Accredited as a medical Device, recognized by the Food and Drug Administration FDA, Saudi Food and Drug Administration SFDA, and TGA.

Burnshield is highly recommended by many doctors, safety and emergency professionals worldwide; it is considered as indispensable in burn or fire trauma situations.

General Features:

- Reduces the temperature of the skin to 15 degrees C in less than 60 seconds, thus pain stopped completely.
- Protects against bacterial infection by forming a shield over the area.
- Minimizes shock and skin damage.
- Halting the burn process and physically protecting against wound contamination due to its anti-microbial properties.
- The sterile dressing keeps the wound clean, which minimizes the possibility of tissue and burn-area damage; and the loss of body fluids kept to a minimum.
- Does not stick to the skin under any circumstances.
- Transparent and dissolves in water, which allows for quick medical diagnosis instead of taking time for removing non-transparent material.
- Minimizes damage and trauma caused by burns.
- Helps in healing promotion for the affected area, and so, reduces time and cost for healing.
- Any burn whether received from open flames, scalding, hot water, steam, gas, chemicals or electrical appliances, and even Sunburns can be treated immediately with Burnshield.

FOAM BASE DRESSING

The Foam Dressing is designed for optimal heat dissipation. It conforms to the wound area and is made from a fibreless elastic open-cell foam sheeting.

Key Features:

- Fibreless elastic open-cell foam sheeting.
- Sterile.
- Absorbs and dissipates heat: minimizes burn damage.
- Cover and conforms to wound area.
- Gel retention.
- Cooling: pain relief and shock reduction.
- Non-stick: will not adhere to wound.
- Natural anti-bacterial: reduce infection.
- Non toxic, Non irritant Safe to use on Children.

COTTON BASE DRESSING

The Cotton based Contour Burn Dressing was developed as an extension to the professional range as a half body and full body dressing which makes this unique for the hospital and pre-hospital environment. It is also cost effective.

Key Features:

- Fibreless cotton.
- Sterile.
- Absorbs and dissipates heat: minimizes burn damage.
- Comfort and conformity.
- Gel retention.
- Cooling: pain relief and shock reduction.
- Non-stick: will not adhere to wound.
- Natural anti-bacterial: reduce infection.
- Non toxic, Non irritant Safe to use on Children.

COTTON BASE DRESSING

The Cotton based Contour Burn Dressing was developed as an extension to the professional range as a half body and full body dressing which makes this unique for the hospital and pre-hospital environment. It is also cost effective.

Key Features:

- Fibreless cotton.
- Sterile.
- Absorbs and dissipates heat: minimizes burn damage.
- Comfort and conformity.
- Gel retention.
- Cooling: pain relief and shock reduction.
- Non-stick: will not adhere to wound.
- Natural anti-bacterial: reduce infection.
- Non toxic, Non irritant Safe to use on Children.

HYDROGELS

Suitable for the treatment of Sun Burn, Superficial / Partial Thickness burns, rehydration of dressings and difficult to-get-to areas. Burnshield Hydrogel helps prevent infection and the high water content in the gel promotes rapid cooling resulting in minimizing skin damage.

Key Features:

- Sterile
- Absorbs and dissipates heat: minimizes burn damage
- Cooling: pain relief and shock reduction.
- Clear: easy to assess wound.
- Non-stick: will not adhere to wound.
- Natural anti-bacterial: reduce infection.
- Non toxic, Non irritant Safe to use on Children.

TRAUMA / FIRE BLANKET

Burnshield's original ground-breaking product, Fire Trauma Blanket was developed in conjunction with the Wool Board and the CSIR for the emergency services market. This versatile application is used as protection for rescue workers entering or leaving a fire area. It can also be used to extinguish flames on a burn victim and, if necessary, be used a large dressing, providing instant pain relief and begin the healing process while victims are being transported to emergency care units.

Burnshield Blanket works as a shield against heat and fire. It is found in different sizes up to blankets that are used in entering the fire area and escaping from it for saving lives. This blanket can withstand extreme temperatures of above 1000 Degrees Celsius up to several minutes. Burnshield blanket is also used for protecting fire-fighters and rescue workers when there is a fire by allowing them to approach the fire area or center of the fire easily with protection, to enable more effective firefighting, it also provides a means of escaping through fire for people who are trapped and surrounded by fire. It can be also used - if necessary - to stifle home-fires or small flames.

Burnshield offers a wide range of Emergency and First aid Burncare kits designed for emergency medical services and industry. It is supplied with high quality essential items to treat and cool a burn in an emergency.

Burnshield kits contains an array of Burnshield solutions, medical disposables and essential provisions to ensure you are well equipped in an emergency situation involving a burn injury. Kit contents can be bought individually to ensure the kit is always fully stocked after every use.

Key Features:

- The Blanket is made from 100% wool and is woven into a specially designed interlinking cellular structure for maximum effectiveness.
- Withstand extreme temperatures of above 1000 Degrees Celsius up to several minutes, or 1500 Degrees Celsius for more than 30 seconds.
- The flexible shoulder barrel-bag allows for hands free portability and storage.
- Sterile.
- Absorbs and dissipates heat: minimizes burn damage.
- Cooling: pain relief and shock reduction.
- Non-stick: will not adhere to wound.
- Natural anti-bacterial: reduce infection.
- Non toxic, Non irritant Safe to use on Children.

AMBULANCE VEHICLE

CREATE. ENHANCE. AND SUSTAIN

LOCAL
CUSTOMIZED
MANUFACTURING
IS OUR EDGE

Our Ambulances are built using the highest quality materials and components and are custom designed to meet the specific needs of our customers and their medical/emergency response missions.

FHC Ambulances are available in small, medium, and heavy-duty versions. All our ambulances incorporate value-packed features such as control systems, lighting, and high-end medical equipment.

- Available in Type I, Type II, and Type III versions, and as multi-patient ambulance buses
- Designed in accordance with KKK-1822, NFPA 1917, and CAAS recommendations for optimal crew and patient safety and comfort.

BIOHAZARD CONTROL SOLUTIONS

AT A COST-EFFECTIVE PRICE

Burnshield is used as a first aid on 1st, 2nd, and 3rd degree burns including facial burns and scalds. Regardless of the cause of the burn (whether fire, chemical, electrical, heat, radiation, sunburn

WHY DAILYMAG?

■ Comprehensive Product Range

Totaling hundreds of models of Sharps Containers

■ New Designs

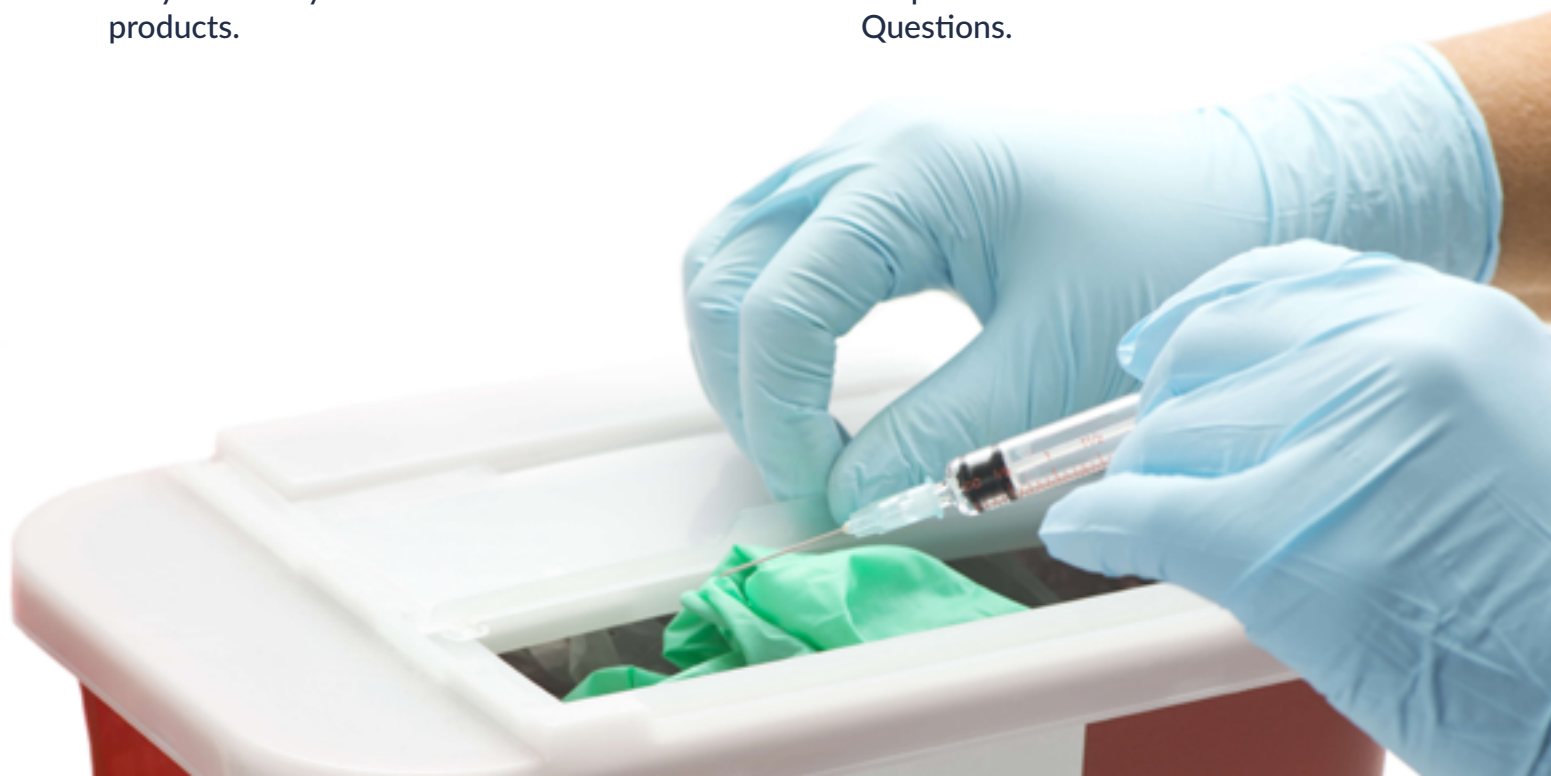

More than 10 types of new designs every year.

■ Performance & Low Cost

Let you be very satisfied with the products.

■ Service Guarantee

Response within 24 hours for all Questions.

K Series

- Smart size.
- Leak proof and puncture resistant.
- Appropriate sliding opening.
- Temporary closure & definite closure.
- Needle removal cap.
- Befitting for the pocket.
- Very convenient for outdoor or travel use.

F Series

- Most popular quadrate shape.
- Leak proof and puncture resistant.
- Wide and clear opening for easy disposal.
- Counterbalanced door for hands-free disposal.
- Ergonomically-designed handle.
- Temporary closure & definite closure.
- Practical rotating/sliding temporary lid.
- Secure perimeter lock for safe usage and transportation.
- Easy manipulation.
- Comprehensive label details.
- Safe to human health and environment.

R Series

- New-developed round shape.
- Leak proof and puncture resistant.
- Funnel-designed and built-in needle removal cap for easy and safe disposal.
- Various indent design for easy needle removal.
- Temporary closure & definite closure.
- Convenient extra lid design for temporary and final closure.
- Secure perimeter lock for safe usage and transportation.
- Easy manipulation.
- Comprehensive label details.
- Safe to human health and environment.

Y Series

- Traditional-designed round shape.
- Leak proof and puncture resistant.
- Wide opening for easy disposal.
- Temporary closure & definite closure.
- Large and practical rotating/sliding temporary lid.
- Secure perimeter lock for safe usage and transportation.
- Easy manipulation.
- Comprehensive label details.
- Safe to human health and environment.

S Series

- Special and square shape.
- Newly designed.
- Leak proof and puncture resistant.
- Solid and stable stand.
- 2L, 7L, 7.6L and 22.7L models are perfect for long size needle disposal.
- Cardboard sharps box for special needs.
- Secure perimeter lock for safe usage and transportation.
- Easy manipulation.
- Comprehensive label details
- Safe to human health and environment.

T Series

- Novel quadrate shape.
- Leak proof and puncture resistant.
- Wide, clear and practical opening for easy and safe disposal.
- Counterbalanced door for hands- free disposal.
- Built-in needle removal.
- Ergonomically-designed handle on the side/lid.
- Temporary closure & definite closure.
- Secure perimeter lock for safe usage and transportation.
- Easy manipulation.
- Comprehensive label details.
- Safe to human health and environment.

PERSONAL PROTECTIVE EQUIPMENT

INTEGRATED TO PROTECT HUMANS & ASSETS

A close-up photograph of a healthcare worker wearing a blue surgical cap, clear safety goggles, a white N95-style face mask, and blue nitrile gloves. The worker is looking directly at the camera. In the background, another person in similar PPE is visible but out of focus.

OFFERING
FULL RANGE
OF SAFETY
SOLUTIONS

REDA Hazard Control has collaborated with the industry's leading manufacturers of safety equipment, materials and systems providing our customers with a full range of solutions. From top to toe, we have the experience and knowledge to provide the products that best fits your needs.

Our range of products include the following:

- Head Protection; hard hats and helmets
- Face Protection; half and full masks, shields, respirators and breathing devices.
- Eye Protection; glasses, goggles, emergency eyewash and showers.
- Hearing Protection; muffs and bongs
- Body Protection; chemical, fire resistance, arc flash and disposable cloths, fall protection products and cooling vests
- Foot Protection; all types of safety shoes.

- Lockout - Tagout, sign and printer products First Aid Products.

And many more....

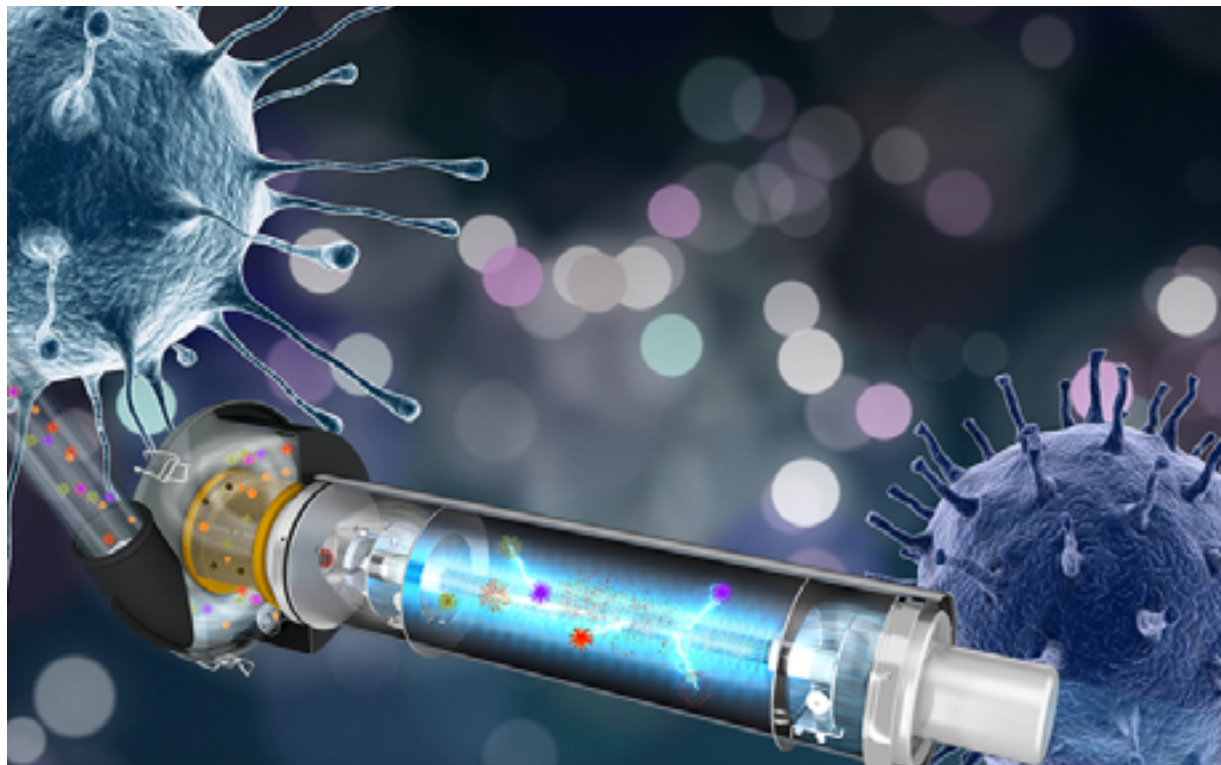

NEW INNOVATIONS

WHAT IS NOW PROVIDED WAS ONCE ONLY IMAGINED

Virus removal from the Breathing Air

This unit got developed to remove bacteria, pollens & virus from the air entering Breathing air compressor & B-blending Nitrox compressors. This unit uses special UV filter with frequency which kills RNA of the virus & ensures virus free air in the hospitals.

Helium Recovery Application

Helium is widely used in Medical equipment like MRI (Magnetic Resonance Imaging) machine. Liquid helium is used because of its cold temperatures which helps in superconductivity process. Basically, It cools down the magnetic sensors which create images of the human body.

As helium is an expensive gas medical companies try to recover the evaporating Helium which can be given back to the gas companies.

HOSPITALS AND CLINICS FURNITURE

AT A COST-EFFECTIVE PRICE

Fabrics with Heritage

Behrens group is a company that was founded in 1834, that offers a diverse range of textile products operating in many market places. Behrens has a reputation for excellence built on a tradition of trusted products throughout 190 years of its history. Behrens comprises a successful furnishings and Fabric businesses. Its collections offer a wide range of products for use in the Healthy Home environment, from its expansive range of furnishings and Fabrics products. Behrens Fabrics supply a wide variety of specialist and basic fabric options. Our collections have been designed to meet the needs of a diverse number of end uses and product categories.

Behrens Healthcare

Behrens Healthcare are a leading UK Supplier of a wide range of products used in the healthcare environment. They have over 40 years experience working with the NHS and other leading Healthcare Institutions and take pride in their reputation for excellence built on high quality products and outstanding service.

Behrens Healthcare supply 3 groups of products:

- Contract Furnishings: Fabric Curtains, Blinds, Tracks, FR Fabrics and Bedding
- Disposable Cubicle, Window and Shower Curtains
- Female and Male Uniforms and Workwear

Contract

We are one of the UK's largest manufacturers and suppliers of contract furnishings to the NHS and private healthcare sector. Product options include fabric curtains, window blinds, tracking systems and bedding. All of our curtains have been tested to ensure compliance with NHS Specification for Flame Retardant Fabrics. All our fabrics meet the required British Standard BS 5867 Part 2 type B/C.

Disposable Cubicle, Window and Shower

Our Extensive disposable curtain range includes bed curtains, disposable blinds, disposable shower curtains, bespoke printed and patterned disposable curtains.

Female and Male Uniforms and Workwear

We have a fantastic stock supported range of female and male healthcare and work wear tunics, trousers and tabards especially created and designed for comfort and durability for the medical and healthcare profession. Our collection of healthcare uniforms covers both traditional and modern styles in an extensive range of colours and sizes. All our healthcare garments are manufactured in vat dyed polyester cotton which resists loss of colour on contact with most bleaches.

DISASTER MANAGEMENT SYSTEMS

AT A COST-EFFECTIVE PRICE

Disaster Management Systems, Inc. (DMS) is the nation's leading provider of ICS / NIMS products for Fire Departments, EMS Agencies, hospitals, schools, and law enforcement. Our nationally adopted process for MCI management (EMT3 System) helps ensure proper patient Triage, Treatment, and Transport during an MCI.

We offer a wide range of disaster preparedness solutions, from our All Risk® START and SALT triage tags to our Evac123 patient evacuation system and tabletop training kits. All of our disaster management product solutions are proven to help first responders and first receivers stay prepared and save lives.
