FIRE EMERGENCY VEHICLES SERVICE

MAINTENANCE FOR FIRE TRUCKS

THE NATIONAL FIRE PROTECTION ASSOCIATION STANDARD
1991 GOVERN THE INSPECTION, TESTING AND
MAINTENANCE OF IN SERVICE EMERGENCY VEHICLES AND
RETIREMENT

Emergency vehicles are a complex assembly of machinery. Thus, they require specialized maintenance service and maintenance plan to keep the maintenance.

In this regard REDA Hazard Control has a dedicated service team to help organizations plan and maintain their emergency vehicles fleet. RHC can assist customers with complete life cycle service of any kind of emergency vehicles; from purchase to retirement. All RHC services follow NFPA requirements.

RHC Emergency Vehicles service team is well qualified and specialized in the service of various types of emergency vehicles. These include all kinds of Fire Trucks (Industrial Pumper Truck, Ladder Trucks), Rescue Trucks, Rapid Intervention Vehicle, Command posts and Ambulances. The team is trained for maintenance and operation of trucks by Rosenbauer, Ford, MAN, Volo and Scania.

RHC also has vehicle diagnostic test facility to help locate any system issues on the vehicle.

RHC is the Authorized distributor for ROSENBAUER Truck in Saudi Arabia.

- FT Generator services
- In house trouble shooting training for FT zones (Engine, Transmission,Pump)

PUMP FLOW TEST FACILITY

50,000 GALLONS WATER CAPACITIES

THE FIRE TRUCKS ARE SMART VEHICLE THAT HAS BEEN CUSTOMIZED FOR USE DURING FIREFIGHTING OPERATIONS. REGULAR SERVICE IS THE MOST IMPORTANT PART OF FIRE TRUCK PROCESS.

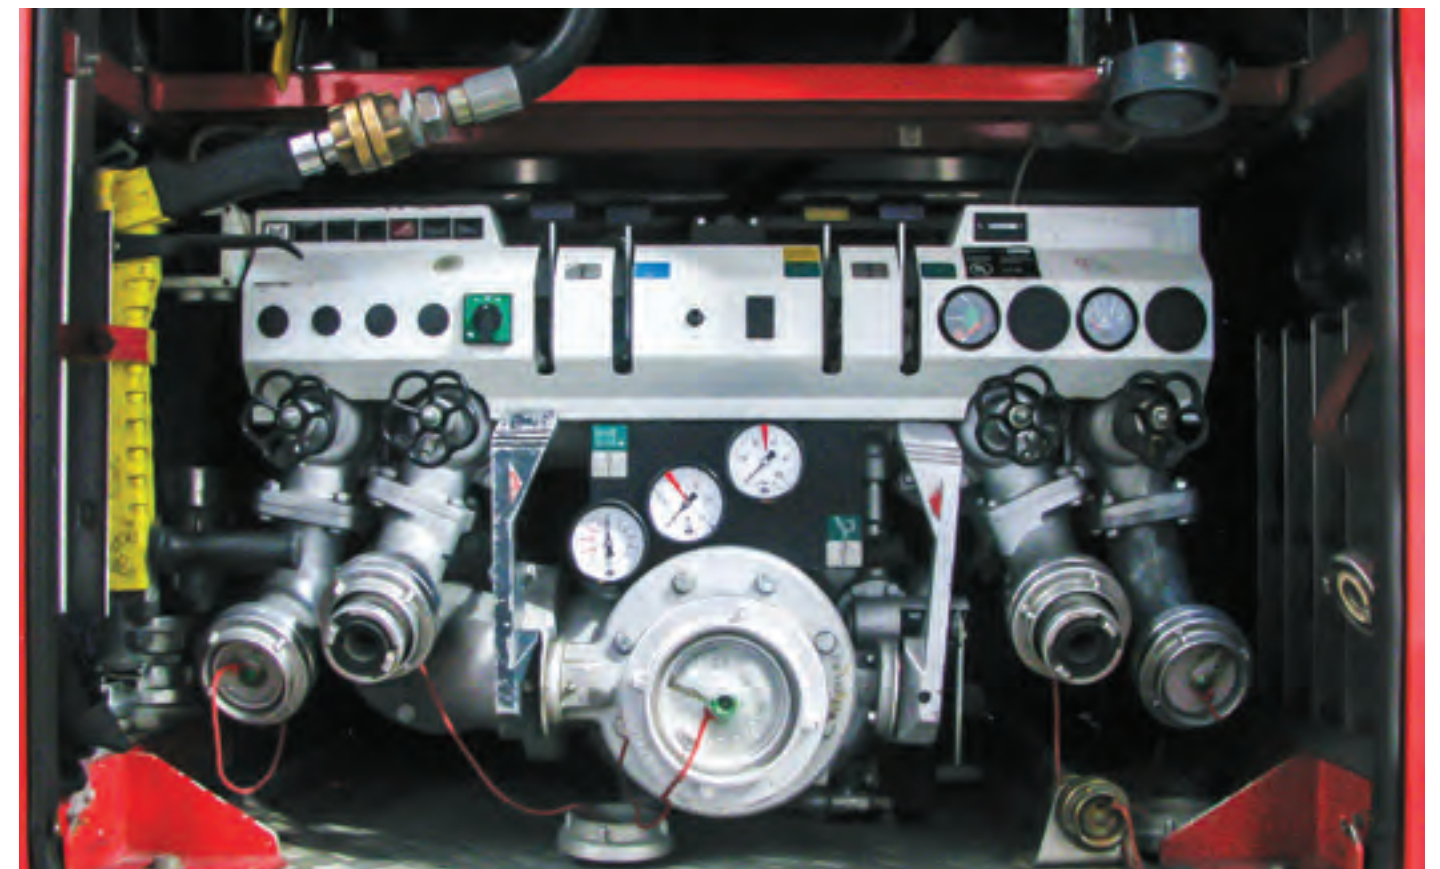

UP TO 3000 GPM PUMP FLOW RATE CAPACITY

Annual performance testing of fire Pumper trucks completed by REDA using criteria established by NFPA 1911 to verify they will function as designed and when compared with the original manufacture design specifications and pump operations.

We have advanced Pump PIT Test facility in our service centre to do the pump testing.

PUMP TESTING SOFTWARE

We utilize custom designed PLC based automated pump testing software (APTS) that allows all system parameters to be monitored and controlled from a central control station, thus achieving and maintaining specific operating conditions. This enables data from calibrated precision electronic sensors to be collected and recorded for use in determining pump performance.

BREATHING AIR COMPRESSOR

SERVICE AND MAINTENANCE

CERTIFIED TEAM TO ASSIST YOU ON BAUER BREATHING AIR COMPRESSOR SERVICE AND MAINTENANCE
